## Case Study - May 2018

### Acoustic Treatment of TV & Hi-Fi Room

**Client:** Audio Professionals

**Location:** Pretoria

**History:** The client experienced poor sound from his TV and Hi-Fi system because of bad room acoustics in and around his TV room. We were approached by Audio Professionals who took care of the audio and media equipment. Audio Professionals asked us to come up with an acoustic solution to improve the sound in their client's home.

**The Solution:** The exposed ceiling was treated using Industro-Foam acoustic panels fixed directly to the ceiling. An S5 panel with high-resolution print was hung on the back wall. Genesis Feature wall was designed and fixed around the screen. Not only did this improve the acoustics within the space, but it added a unique looking feature to the TV room.

**Owner Andre's comments:**

"The sound in the TV room is much better than before. Myself and the client are very happy with the acoustic treatment. The workmanship by Henk and his installation team is nicely done and neat. I'm also very happy with the service and the design of the project. Positive all round!"

**FULL TREATMENT**
