

Case Study

Moyo Business Advisory

HR Manager: Yandri Pienaar
Location: Centurion, Gauteng
Contact info:

History:

The HR Manager of Moyo Business Advisory had a problem with the echo sound in their boardroom and the intelligibility of speech when they were having conference calls. The boardroom has a lot of large windows and a suspended ceiling system with standard ceiling panels.

The ceiling panels were removed and replaced with the following products supplied by Genesis Acoustics:

- Genesis Acoustics 75mm thick Cavity Insulation (Placed in the ceiling cavity above ceiling panels)
- Genesis Acoustics Ceiling Panels – NRC 0.7

Client's comments:

"We are very happy with the results after installing the products. It really made a big difference in the acoustics of the room. We want to install the ceiling panels in our small boardroom as soon as possible!"
